THE TUBES

TUBES ARE SMALL, BUT MAKE A BIG IMPACT!

By bottling wine and spirits per glass in our innovative 35 ml, 50 ml and 100 ml tubes we create more tasting opportunities, encourage responsible drinking and contribute to a more sustainable world.

THE AMOUNT OF ONE GLASS: 100ML, 50ML OR 35ML, DEPENING

WINES AND SPIRITS BECOME MORE ACCESSIBLE

OUR SINGLE SERVE CONCEPT MAKES WINE AND SPIRITS MORE ACCESSIBLE

SINGLE SERVE

We produce tubes for various beverages. And since we offer a 'by the glass' solution, our tubes come in several sizes. Afterall, the volume of a glass wine is different than a glass of whisky. This is why we produce 35 ml and 50 ml tubes for spirits and 100 ml tubes for wine.

COMPACT

One bottle of wine equals seven tubes. They are small, slim and light and help you save space and weight. By using tubes, you can reduce your shipping costs and decrease your carbon footprint.

CUSTOM

Your beverage in our tubes? No problem! We bottle various beverages. To complete your custom tubes, the silk print can be designed for or by you, with branding of your choice. Ask us about the possibilities.

MATERIAL

Our tubes are made from glass or recycled plastic, both 100% recyclable. Which material you select, depends on the purpose and on your preference of course. Our plastic tubes are unbreakable and can be shipped by mail. Our glass tubes have a more luxurious appearance and can be used as a unique gift or high-end tasting tool. We'll be happy to assist you in making your choice between the two.

PRESERVATION

Once bottled, the products inside our tubes have a long shelf-life. The preservation of organoleptic qualities is guaranteed. Our recycled plastic tubes can be preserved between 6 and 9 months and our glass tubes have a shelf-life of 24 months.

BOTTLING

All of our tubes are bottled according to strict standards and specifications. Using a 100% inert atmosphere ensures the quality of the product is maintained.
